

Environmental Policy

We believe our current and future responsibility to society is to develop innovative, value-added products and technologies that improve patient outcomes and healthcare worldwide. The NIPRO Group will contribute to the creation of a sustainable society by taking initiatives that give due consideration to the environment in all of its business activities.

1. The NIPRO Group will promote in all its business activities:
 - Reduced consumption of resources, energy, and water;
 - Reduction in greenhouse gas emissions;
 - Waste reduction and recycling;
 - Proper management of chemical substances; and
 - Conservation of biodiversity.
2. The NIPRO Group will endeavor to identify and reduce the impacts of its products and services on the environment.
3. The NIPRO Group will comply with the applicable environment-related laws, regulations, and ordinances of all relevant countries and regions.
4. The NIPRO Group will make the Environmental Policy known throughout the Group across all departments, urge strict adherence to the policy, and implement training and education to promote understanding of environmental issues.
5. The NIPRO Group will set goals in environmental conservation, and appropriately disclose its initiatives to achieve such goals and progress in such initiatives.
